

## RIMiT series

Redesign luminaire to go beyond  
the minimum size.

# RIMiT sm

SuMi

Releasing in October 2023

New application lighting  
that fits into an inner or outer corner.

60 different length variations  
with a shorter lead time.

Image

## scene 1 Corner ceiling

Efficiently illuminates space with two-sided luminescence. Possible to create the illusion that the entrance corner is glowing.

Image

## scene 2 Corner wall

Stylish entry-corner line lighting with mounting clips that are concealed in the fixture

Image

Stylish step lighting ►  
with short Luci RIMiT sm installed vertically  
at the corner of the stair kick.

## scene 3 Corner

Able to illuminate both sides  
of a prertruding corner

Image

## scene 4 Showcase

Thin frame with showcase lightings

Image

## scene 5 Ceiling cove

Cut-off line in cove lighting is less likely to appear allowing light to spread softly from both side of the luminescence.

Image

## Point

When using one-sided luminescence

Visible cut-off line

When using RIMiT sm 2 sided luminescence

Softer spread of light making cut-off line not so visible

## Installing the product

### Mounting clip E installation

Mounting clips are designed to hold the luminaire in place by spreading both sides. Please leave at least 2mm of gap on both sides for maintenance.

### Mounting clip F installation

※ Install lighting vertically or not want clip to be visible

Please make sure to flush the flat head of screws with the surface of the mounting parts. Otherwise, the lighting fixture may not be completely hooked and fall off.

### Mounting clip E and Lift Parts installation

Please make sure to flush the flat head of screws with the surface of the mounting parts. Otherwise, the lighting fixture may not be completely hooked and fall off.

### Mounting clip F and Lift Parts installation

### Mounting clip E and Magnet installation

### Recommended position of clip and magnet

Recommended mounting position (pitch: 20mm to 300mm, quantity: 2 to 5 pieces) depends on the length of the luminaire. Please refer to the attached table on p.8

### Recommended position of magnetic tape and double-sided tape

## System configuration diagram

- ① Max. connectable total length of LED fixture per power supply depends on capacity of power supply. Recommended loading factor: 70% (without dimming) or 60% (with dimming)
- ② If connectable length of LED fixture per circuit exceeds the maximum, please split into multiple circuit.
- ③ To avoid voltage drop, please consider the max. distance from power supply to the end of LED fixture. (i.e. total cable length plus LED fixture length)
